

# GLUE FORTE

## Glue for mice and rats

### DESCRIPTION:

Special glue for the capture of mice and rats based on a combination of polybutene and polyisobutylene. The product is non-flammable, non-toxic, odorless and retains its characteristics unchanged for long periods of time. Due to its composition, the glue resists adverse weather conditions while maintaining its adhesive power. The product is compatible with different materials and surfaces.

### MODE OF USE:

Spread the glue on a wooden board or cardboard.  
Wait 30 minutes until the glue has completely spread over the entire surface.  
Place the trap along the walls, hide it behind objects such as furniture or drawers and monitor every 2 days.  
Dispose of in accordance with local regulations.  
**Read the label before use.**

### COMPOSITION:

Polybutene based glue

<b>Physical state</b>	Semi-fluid paste
<b>Color</b>	Transparent
<b>Odor</b>	Absent
<b>Density 25 °C</b>	0.85-0.95
<b>Solubility</b>	Non water soluble

### TOXICOLOGICAL INFORMATION:

The product is not classified as toxic in accordance with the provisions laid down in Regulation (EC) No. 1272/2008 (CLP). Safety data sheet available on request.

### HANDLING, TRANSPORT AND STORAGE:

The product has a shelf-life of 60 months, when stored in original unopened containers at temperatures between 5 and 35°C and when stored and transported hygienically, avoiding frost and direct sunlight. During storage the product may separate and must be homogenized by simple stirring before use.

### PACKAGING:

135gr tube inside box.  
5 L Bucket.
